

BAGNALL 0-4-0ST

7/8ths SCALE • 45 mm GAUGE

S78-3G BAGNALL 0-4-0ST, GREEN

Bagnall were renowned builders of industrial locomotives for both standard gauge and narrow gauge. They developed a huge range of designs and built numerous engines for the 'big four' and the MOD. The 7" x 12" saddle tank was a mid-range narrow gauge design that could be supplied in a number of different formats. Several examples of the type have been preserved, one of the most famous being the Rev. Teddy Boston's 'Pixie' which ran round his railway in the garden of Cadeby rectory!

In light of the success of our Quarry Hunslet in this scale, used to represent 2' gauge on 45mm track, we have decided to produce our second live steam locomotive for this market. The more generous proportions of models in this scale have given us the opportunity to look at prototypes which would be rather too small in 1:19 scale but which we have long hankered to produce. The model is gas fired and fitted with a water top up valve, water gauge with blow-down valve, miniature pressure gauge; constructed of stainless steel and etched brass, the loco has an enhanced level of detail made possible by this scale including a brake stand / gas control valve, dummy water gauge. It is not gauge-adjustable and is only available in 45mm gauge.

SPECIFICATIONS

Scale	7/8 ths
Gauge	45 mm
Mini. radius	30 in.
Dimensions	12.6 x 4.9 x 7.5 in.
Construction	Brass & stainless steel
Power	Live steam, butane fired
Boiler	Copper, single flue
Features	Simplified Walschaerts valve gear
	Safety valve
	Miniature pressure gauge
	Water level gauge w/ blow-down valve
	Goodall valve
	Displacement lubricator w/ under-floor drain
