

# EMMA 0-4-0

7/8ths SCALE • 45 mm GAUGE

AC77-502 Emma 0-4-0

Emma is a model of a Brooks industrial 0-4-0T. Brooks Locomotive Works, of Dunkirk, New York was an important supplier of locomotives to railroads and industry. In 1901, Brooks and several other locomotive builders merged to become the American Locomotive Company, or ALCO.

Operating Emma is similar to the operation of other small-scale steam locomotives. The engine should pull up to half a dozen standard-size 7/8"-scale freight cars on good, level track, which is about the same capacity as a full-size locomotive of this configuration. Grades and sharp curves will diminish its capability.

## SPECIFICATIONS

Scale	7/8 ths
Gauge	45 mm
Mini. radius	48 in.
Dimensions	12.9 x 5.4 x 7 in.
Construction	Brass & stainless steel
Power	Live steam, butane fired
Boiler	Copper, single flue
Features	D-valve
	Safety valve
	Forward/Reverse control
	Lubricator
	Water level gauge

ITEMS SUBJECT TO CHANGE IN PRICE, COLOR, SPECIFICATION, DESIGN AND AVAILABILITY WITHOUT NOTICE.
