

AMERICAN 4-4-0

1:20.3 SCALE • 45 mm GAUGE

AC77-724 4-4-0 D&RG COL. BOONE #101

The 4-4-0 was a small sized inside frame locomotive that worked all over North and South America. They were Built in the 1870's and 1880's. The 4-4-0 shared many common parts with other similar sized locomotives of the same period. The three point suspension allowed these engines to go over fairly rough track without derailing, and also because of their large drivers move along at a good speed with a passenger train on level track. The classic 4-4-0 or American is the locomotive that most people think of when the old west was young. Hollywood correctly uses these preserved locomotives even today when needing trains of that period.

SPECIFICATIONS

Scale	1:20.3
Gauge	45 mm
Mini. radius	48 in. (1.2 M)
Dimensions	26.35 x 4.13 x 7.68 in.
Construction	Brass & stainless steel
Power	Live steam, butane fired
Boiler	Copper, butane, single flue
Valve	D-valve
Valve gear	Simplified Stephenson
Features	Safety valve
	Pressure gauge
	Water level gauge
	Throttle
	Adjustable Lubricator
