

'BLACK 5' LMS/BR

1:32 SCALE • 45 mm GAUGE

ELECTRIC MODEL SHOWN

The London Midland and Scottish Railway's Class 5 4-6-0, almost universally known as the Black Five was introduced by William Stanier in 1934 and 842 were built between then and 1951. Members of the class survived to the last day of steam on British Railways, in 1968, and eighteen are preserved.

The Black Fives were a mixed traffic locomotive, a "do-anything go-anywhere" type, designed by Stanier, who had previously been with the GWR. In his early LMS days he acquiesced with the completion of a small number of 2-6-0s already under construction. But Stanier realised that there was a need for larger locomotives. These were to be the LMS's copy of the GWR Halls. They shared similar cylinder arrangement (two outside), internal boiler design and size and 6 foot driving wheel diameters.

The model is in 1:32 scale and 45mm gauge and features all metal construction with three versions. The model is gas-fired and has all the features the Gauge 1 fraternity have come to expect from an Accucraft locomotive. The chassis is constructed from stainless steel. The boiler is copper, the cab and tender are constructed from etched brass. Like other fine scale models from Accucraft, it will provide many years of enjoyment.

SPECIFICATIONS

Scale	1:32
Gauge	45 mm
Mini. radius	48 in. (2 m)
Dimensions	23.5 x 3.5 x 5 in.
Construction	Brass & stainless steel
Electric Model	
Power	0~24V DC
Features	Full cab interior design Constant lighting
Live Steam Model	
Power	Live steam, butane fired
Boiler	Copper, centre flue
Working pressure	60 psi
Features	Safety valve Pressure gauge Water level gauge Reverse lever Lubricator Throttle valve Axle driven pump w/ bypass valve Water hand pump w/ check valve
