

K-36 D&RGW 2-8-2

1:20.3 SCALE • 45 mm GAUGE

AL87-231 K-36 #480, BUTANE FIRED

In 1925 the D&RGW railroad received from Baldwin Locomotive Works ten 2-8-2 locomotives numbered from #480 to #489. Their Classification would be K-36 for they had a tractive effort of approximately 36,000 pounds. These were significantly larger than the locomotives of the recently acquired K-28 class had super heaters, and were equipped with the most up to date features for steam locomotives of the year.

They were put to work in places that demanded their superior power; were well received by their crews and through the years have come to symbolize perhaps the "high water mark" of American narrow gauge motive power. In fact, many narrow gauge fans are quick to nominate the K-36 as their favorite locomotive.

Happily, except for one locomotive which was dismantled (#485), one was put on display and the rest eventually found their way to either the Durango and Silverton Narrow Gauge, or the Cumbres and Toltec Scenic Railway.

SPECIFICATIONS

Scale	1:20.3
Gauge	45 mm
Mini. radius	48 in. (1.2 M)
Dimensions	44 x 6.25 x 8.25 in.
Construction	Brass & stainless steel
Electric Version	
Power	0~24V DC
Features	Steel gears drive system Full valve gear details Full cab details
Live Steam Version	
Power	Live steam, butane fired
Boiler	Copper, butane, two flues
Valve	D-slide valve
Valve gear	Walschaert's valve
Working Pressure	60 psi
Features	Safety valve Pressure gauge Water level gauge Throttle Adjustable Lubricator
