

CP T-1C CLASS 2-10-4 SELKIRK #5935

1:32 SCALE • 45 mm GAUGE

AL97-090 CP SELKIRK #5935

Accucraft's "Selkirk" #5935 represents the last T-1c class 2-10-4 built. Constructed by Montreal Locomotive Works in February/March 1949 as CP 5930-5935, these six oil burning T-1c class locos remained in service less than 10 years; the railway was already replacing steam with diesels. The 1:1 scale CP #5935 is preserved and on display at Exporail, the Canadian Railway Museum in Saint-Constant, Québec.

All Accucraft Trains models are designed and built to exacting standards from carefully researched plans and prototype measurements. We painstakingly hand-craft every part from brass and stainless steel. Every effort is made to ensure the highest quality in what we build.

SPECIFICATIONS

Scale	1:32
Gauge	45 mm
Mini. radius	10 ft.
Dimensions	TBA
Construction	Brass & stainless steel
Power	Live steam, alcohol fired
Boiler	Copper
Valve	D-valve
Cylinder	2 Cylinders
Working pressure	60 psi
Features	Two safety valves
	Pressure gauge
	Water level gauge
	Blow down valve
	Throttle valve
	Lubricator
	Hand operated water pump in tender
Axle driven pump w/ bypass valve
